

Making History at Concord's Old North Bridge

Here's a chance to make history where American history was made!

On October 24th International Climate Action Day, an Energy Revolution Rally will be held in Concord. Featuring minutemen and a variety of speakers, the 2 PM rally will show support for the negotiation of a strong climate action agreement at the U.N. summit in Copenhagen this December. Among the invited speakers are Governor Patrick, other prominent politicians, distinguished scientists, celebrities and more.

Rally participants will be making history because more than 1,000 similar events will be taking place around the world on October 24th. Taken together they will constitute the largest climate rally ever held (more details at www.350.org.)

Come to the iconic Old North Bridge at the Minute Man National Historical Park (adjacent to the Visitor's Center on Liberty Street) and make your voice heard! Energy Revolution Rally details can be found at <http://www.gwenet.org/events.htm>.
